

The IDAD Fund (formerly The Structured Product Fund) Sterling Ordinary Fund Factsheet - March 2019

Investment Aims

The IDAD Fund plc is intended to meet the needs of investors seeking medium to long-term capital growth who are willing to accept a moderate level of risk. The target for the Fund is to achieve annualised returns between 5% and 15%. Higher returns on an investment cannot normally be achieved without increased risks to capital, or a reduced probability of receiving the returns. The Fund manages the risks to capital in a number of ways, as well as working to enhance the probability of delivering the targeted returns.

Investment Manager Commentary

US Bond markets spooked investors for the first time this year as a technical movement, a 'yield curve inversion', indicated to many the threat of an imminent recession in the world's largest economy. We do not share this view as we believe the combination of low unemployment and wage growth will maintain momentum and are actually optimistic that global growth is stabilising as China and even Europe are showing signs of recovery.

By the end of the first quarter of 2019, the IDAD GBP Fund had returned a market beating 16.1%, helped by the broad recovery in equities but also through sound asset allocation decisions. Our Pharma note called during the period with a 12% pay out and our tactical use of thematic ETFs has also boosted returns. We have used the profits from the Pharma note to buy a Morgan Stanley note giving us exposure to two mining companies, BHP Billiton and Rio Tinto that would benefit from a recovery in Chinese demand.

The fund has enjoyed an exceptional start to the year and we remain excited by many of the notes we hold and believe that we can build on the first quarter and deliver attractive returns to investors.
