

The IDAD Fund (formerly The Structured Product Fund) US Dollar Ordinary Fund Factsheet - July 2019

Investment Aims

The IDAD Fund plc is intended to meet the needs of investors seeking medium to long-term capital growth who are willing to accept a moderate level of risk. The target for the Fund is to achieve annualised returns between 5% and 15%. Higher returns on an investment cannot normally be achieved without increased risks to capital, or a reduced probability of receiving the returns. The Fund manages the risks to capital in a number of ways, as well as working to enhance the probability of delivering the targeted returns.

Investment Manager Commentary

Equity markets resumed their upward march last month as the combination of modest economic growth, subdued inflation and the prospect of the Federal Reserve cutting rates proved intoxicating for investors. In the UK, Boris Johnson became the new UK Prime Minister and immediately raised the possibility of a no deal Brexit, perhaps just for posturing in negotiations with the EU, perhaps to even deliver the Brexit mandate. Either way, Sterling came under pressure affecting the GBP value of our USD notes.

Over the month The IDAD Fund (USD) fell -0.1%, but year to date returns remain strong. There are many clouds on the horizon – slowing growth, rising trade tensions, mixed corporate earnings – but on balance, we remain optimistic that markets have further to run up this year on the back of continued global economic expansion.
