**BNP Paribas Autocall Certificates ( the “Certificates” ) are designed for investors seeking attractive high returns as compared to low deposit rates, and who are moderately bullish on equity markets over the medium term. The potential investment returns are linked to the performance of the Underlying Shares in the Underlying Share Basket. Invested capital is at risk if any of the underlying indices in the Underlying Index Basket closes below the Protection Barrier level at Maturity.**

**Description**

An investment in an Autocall structure, with a 5-year maturity linked to the performance of AnheuserBusch InBev NV, Apple Inc, Royal Dutch Shell Plc, Toyota Motor Corp, Eurostoxx 50 Index, FTSE 100 index, Nikkei 225 Index, and the S&P 500 Index.

In flat and rising equity markets, investors will receive a high return, which accumulates for every quarter the Certificates are not autocalled. Maximum return is 148% which represents both capital and investment return.

**Possibility of Early Redemption:**

19 quarterly opportunities of early redemption,

At each quarter, the Certificates can early redeem if all of the Underlying Shares close at or above the Autocall Barrier of 100%. On early redemption, the Certificates return 100% of the invested capital plus an investment return of 2.4% for every quarter that has passed since the Strike date.

**Repayment at Maturity**

In case there is no early redemption, at Maturity:

An investment return of 48% is paid if all Underlying Shares close at or above their initial level<sup>(1)</sup>.

The Certificates will return 100% of invested capital<sup>(1)</sup> as long as none of the Underlying Indices on the Final Valuation Date close below the Protection Barrier of 60% of their respective initial level.

Capital is at risk if at Maturity any Underlying Index closes below the Protection Barrier of 60% of its initial level in which case investors will receive the invested capital decreased by the performance of the worst performing Underlying Index thus resulting in a partial or total loss of their invested capital.

**Advantages**

- **Potential for attractive growth** in flat, rising or moderately falling market conditions.
- **Early redemption** if all of the Underlying Shares are flat or positive compared to their initial levels on any Observation Date<sup>(1)</sup>.
- **100% capital protection<sup>(1)</sup> at Maturity** if all of the Underlying Indices close at or above the Protection Barrier.
- **No currency risk** between settlement currency and the currencies of the Underlying Share and Indices.

**Drawbacks**

- **Growth potential capped** since investors do not participate directly in any capital growth in the Underlying Share Basket.
- **Risk of partial or total loss of capital:**
  - If any of the Underlying Indices closes below the Protection Barrier at maturity, Capital repayment will be decreased by the performance of the worst performing Underlying Index. In this case the return could be lower than a direct investment in the Underlying Index Basket..
  - In case of bankruptcy or payment default by the issuer or guarantor

(1) Except in the case of bankruptcy or payment default by the Issuer or Guarantor  
(2) As of 18<sup>th</sup> September 2014

This document contains only a summary description of the main features of certain Notes, Warrants or Certificates (the "Securities"). A proposed investment in the Securities cannot be fully assessed without full knowledge and understanding of the relevant Final Terms and the Terms and Conditions contained in the relevant Base Prospectus for such Securities (as supplemented from time to time), which is available from BNPP. In particular, potential investors should carefully read the sections headed "Risk Factors" for a full description of the potential risks associated with the Securities, and the section entitled "Offering and Sale" for certain limitations on the purchase and onward sales of the Securities.

The Securities have no capital protection at any time and investing does put your capital at risk. Investors should be aware that there is risk of partial or total loss of any capital invested. Investment in the Securities is highly speculative and should only be considered by investors who can afford to lose the entire capital invested.

In providing this document, BNPP gives no financial, legal, tax or any other type of advice to, nor has any fiduciary duties towards, recipients. Certain strategies and/or potential transactions discussed in this document involve the use of derivatives, which may be complex in nature and may give rise to substantial risk, including the risk of partial or total loss of any investment. BNPP makes no representation as to whether any of the strategies or transactions discussed herein may be suitable for investors' financial needs, circumstances or requirements. Investors must make their own assessment of the strategies and/or potential transactions, using such professional advisors as they may require. BNPP accepts no liability for any direct or consequential losses arising from any action taken in connection with or reliance on the information contained in this document.

As an investment bank with a wide range of activities, BNPP may face conflicts of interest, which are resolved under legal provisions and internal guidelines.
