

Nomura Balanced Recovery Deposit III

Oct/Nov 2009

For Professional Investors only

This factsheet is for information only and should not be considered as a financial promotion. This information alone should not be relied on for making investment or purchasing decisions.

Key Features

The Balanced Recovery Deposit ("the Deposit") will be placed with Nomura Bank International plc. ("the Bank"), which is a fully FSA regulated credit institution incorporated in London

This Deposit is capital protected at maturity only. This Deposit is intended to be held until Account Closing Date, a term of 6 yrs.

Subject to normal market conditions, a secondary market may be provided at request on an "off execution" basis.

U.K. investors should note that their investment may be subject to Savings Tax on any gains made

Why invest?

The Deposit provides exposure to 4 different assets:

- FTSE 100 index
- EuroStoxx 50 Index
- iShares MSCI Emerging Markets Index
- iShares Iboxx Investment Grade Corporate bond fund

The diversification across four underlyings has the objective of delivering robust cross-cycle performance with reduced levels of volatility.

The underlying investments have been selected to benefit from a global economic recovery.

The Deposit provides the opportunity to participate in balanced growth up to 60% return, combined with the security of capital protection at maturity.

Risks

Please bear in mind that unwinding the Deposit prior to Account Closing Date may result in a redemption of less than 100% of the original amount deposited at the Deposit Date due to payment of certain fees and therefore a potential loss of capital. Any secondary market provided by Nomura International plc is subject to change and may be stopped without notice and investors may therefore be unable to sell or redeem the Deposit until their maturity. The Deposit is considered a commercial deposit and is not eligible to benefit from the Financial Services Compensation Scheme.

Balanced Recovery Deposit III - Overview

- This product has been structured to provide growth returns linked to a diversified basket of assets, in a deposit format
- The deposit offers investors the opportunity for market-linked returns of up to 160%, over a term of 6 years (equiv. to 10% p.a. simple)
- The cross-asset basket has been selected to provide robust cross-cycle performance, and provide portfolio diversification across sectors, geographies and between Equities and Corporate Bonds
- The deposit balances the high growth potential of Emerging Market Equities (iShares MSCI Emerging Markets Index) with the more developed equity exposure of the FTSE 100 index (100 most highly capitalised companies traded on the LSE), and EuroStoxx 50 Index (capitalisation weighted index of 50 European blue-chip stocks, with no single company > 10% of the index).
- The final element incorporates corporate bond exposure through the iShares Iboxx Investment Grade Corporate bond fund. This acts as a stabilising component in the asset portfolio, due to the fact that bond performance is generally observed as being negatively correlated to equity returns
- The final basket performance is subject to averaging over the final year, this has the benefit of protecting the investor from any sudden falls in any asset as the product approaches maturity, but will also reduce the impact of any upward performance over the same period.

Who Can Invest in the Deposit?

The Deposit (minimum subscription GBP 10,000) is available for purchase within the UK and offshore via these investor types:

- Qualified professional investors
- Offshore Life Companies buying as principal
- Corporate and Institutional clients buying as principal

Risks / Fees	For risk warnings and any introducer fees that may have been paid in connection with this product, please refer to the product termsheet.

Capital Protection at Account closing Date

This Deposit is only capital protected at maturity. This Deposit is intended to be held until Account Closing Date. Unwinding the Deposit prior to Account Closing Date may result in a redemption of less than 100% of the original amount deposited at the Deposit Date due to payment of certain fees and therefore a potential loss of capital.

Credit Risk of the Bank

As with any deposit, you are relying on the Bank to pay you the sums due under the deposit (including any capital protection), therefore you are running a credit risk against the Bank. Accordingly, if the Bank becomes insolvent, then you may receive less than the amount you were expecting and possibly receive nothing. Any such payments on insolvency may not be paid for a substantial amount of time.

Characterisation of the Deposit

The Bank makes no representation as to the characterisation of this product as a "deposit" for any purpose or as defined under any applicable laws or regulations. The Deposit is ineligible to benefit from the Financial Services Compensation Scheme. Monies received in this Deposit will be held by the Bank as a banker and not as a trustee. Accordingly, the money will not be held in accordance with the FSA client money rules.
