Investment rationale:

S&P/ASX 200 Index measures the performance of the 200 largest index-eligible stocks listed on the ASX by float-adjusted market capitalization. The S&P/ Toronto Stock Exchange 60 is a capitalization-weighted index. It consists of 60 of the largest and most liquid stocks listed on the Toronto Stock Exchange (TSX). The Swiss Market Index is an index of the largest and most liquid stocks traded on the Geneva, Zurich, and Basle Stock Exchanges. The OMX Stockholm 30 Index consists of the 30 most actively traded stocks on the Stockholm Stock Exchange and is a market weighted price index.

How this product works:

This investment product is linked to the performance of the S&P/ASX 200 Index, S&P/TSX 60 Index, SWISS MARKET Index and OMX STOCKHOLM 30 Index.

At the start of the product, on the trade date, the Investor purchases Denominations of the Note. On Strike date, the closing levels of the underlying are recorded and these levels are taken as the Strike Levels. On each Early Observation Date, the closing levels of the Underlyings are observed, and if all of the underlyings close at or above 100% of their Strike Levels the product is Autocalled, and the Investor receives 100% of his investment returned plus a coupon of 5.3% multiplied by the number of the semi annual Observation Dates (there are 12 Observation Dates in total) and the product terminates). Example:

- If on the 3rd Observation date, the closing level of all the underlying are at or above 100% of their Strikes, then the Note autocalles and the Investor will receive all his investment amount back plus a 5.3% Coupon multiplied by 3 (the number of the Observation Date) and the product terminates.
- If the Investment does not autocalle before the final Observation Date and if on the final Observation Date all indices are above 100% of their initial strikes levels, a fixed coupon of 63.6% plus the original capital is paid. If not all underlying are at or above 100% and not one is below 75% of its Strike level at that time, the investor will receive all its Investment amount back. In the event that at least one underlying is below 75% of its Strike, the amount invested by the Investor will receive back will be reduced.
