Investment rationale:

Kinross Gold gives you exposure of the mining sector, especially on precious metals. LinkedIn gives you the opportunity to participate in the fast developing and global internet market. Tesla is the revolutionary electric car maker which share price has increased six fold since January 2013. All three shares are Blue Chips, and give you access to the biggest and strongest Economy in the world . Its main Index, the S&P 500, grew by roughly 25% since the beginning of 2013.

How this product works:

This investment product is linked to the performance of three internationally known Blue Chips Shares, Kinross Gold, LinkedIn, Tesla Motors.

At the start of the product, on the trade date, the Investor purchases Denominations of the Note. On Strike date, the closing levels of the shares are recorded and these levels are taken as the Strike Levels. On each Early Observation Date, the closing levels of the Shares are observed, and if all of the shares close at or above 100% of their Strike Levels or all of them have closed above their initial strikes on different observation dates the product is Autocalled, and the Investor receives 100% of his investment returned plus a coupon of 5.5% multiplied by the number of the quarterly Observation Dates, (there are 11 Observation Dates in total) and the product terminates. Example:

- If on the 3rd Observation date, the closing level of all shares are at or above 100% of their Strikes, or for instance two of them were at or above 100% of their Strike on the second observation date and the third one is at or above 100% of its Strike on the 3rd observation date (Memory Trigger), then the Note autocalls and the Investor will receive all his investment amount back plus a 5.5% Coupon multiplied by 3 (the number of the Observation Date) and the product terminates.
- If the Investment does not autocall before the final Observation Date and if not all the shares are at or above 100% and not one is below 50% of its Strike level at that time, the Investor will receive all its Investment amount back, with no Coupon payment. In the event that at least one share is below 50% of its Strike, the amount invested by the Investor will receive back will be reduced.
- If on the Final Observation date, the worst performing share closes at 45% of its Strike Level, then the Investor will receive 45% of its initial investment amount returned.
