Investment rationale:

You invest in some of the best performing commodities at the moment.

- Brent is one of the most traded commodities worldwide. With the growth of emerging countries such as Brazil, China and India, the tendency is a further increase in its consumption.
- In the manner of Gold, investors trust in Silver and invested massively in this commodity since the beginning of the year.
- Though not as eye-catching as Silver, Copper ranks up high on the commodity list, its price is a very reliable indication of the health of the global economy considering how much of world's infrastructure rely on copper.

How this product works:

This investment product is linked to the performance of three major commodities, Brent, Silver and Copper. At the start of the product, on the trade date, the Investor purchases Denominations of the Note. On the Strike date, the closing levels of each underlying are recorded and these levels are taken as the Strike Levels. On each Early Observation Date, the closing levels of each underlying is observed, if all commodities close at or above 100% of their Strike Levels, the product is autocalled, and the Investor receives 100% of their investment plus a 4.5% coupon per underlying (13.5%). If only one or two underlyings close at or above 100% of their Strike Levels, the investor will receive a coupon equal to 4.5% times the number of underlyings at or above this threshold and the product continues.

Example:

- If on the first Observation date, 2 commodities out of 3 are above 100% of their Strikes, then the Investor will receive a coupon of 9%, i.e. 4.5% times two.
- If on the fourth Observation date, all underlyings are above 100% of their Strikes, then the Note autocalls and the Investor will receive 100% of investment amount back plus a coupon of 13.5%, i.e. 4.5% times three.
- On the final Observation Date, if the Note has not previously called, and, all 3 commodities are above 50% of their Strike Levels, the Investor will receive 100% of their Investment amount returned plus a coupon equal to 4.5% multiplied by the number of underlyings that have closed above Strike.
- If on the Final Observation date, the least performing commodity closes at 45% of its Strike Level, then the Investor will receive 45% of their initial investment amount.

Underlyings:

- ICE-ICE Brent: The Brent Spot Price is priced in US Dollars per barrel
- London Silver Fix: The Silver Spot Price is priced in US Dollars per Troy Ounce
- LME Copper: tracks the performance of copper prices. Copper is one of the most important industrial metals, it is used for its electrical conductivity and heat-transfer abilities for use in the building construction and electrical industries
