

INVESTMENT DESCRIPTION

A 6 year investment linked to the performance of UK, US, Australian and Chinese Indices.

If on any of the semi-annual observation dates, including the final observation, the closing levels of all the underlying are at least 60% of their initial levels the income coupon will be paid.

This investment will mature early if all the underlyings are equal to or above their initial level on any semi-annual observation date starting end of year 1.

At the final observation date, if all underlyings are at or above 60% of their initial level then full capital is returned. If any underlying is below 60% of its original level, capital return will be reduced on a 1-for-1 basis. For example if the worst performing underlying has fallen to 40% of its original level 40% of the capital will be paid.

BENEFITS

- Opportunity for regular income payments even where markets show significant falls
- Autocall feature potentially shortens the investment term and is triggered by minimal market growth
- Early maturity provides an opportunity to re-assess client's wealth strategy
- Daily pricing and trading available

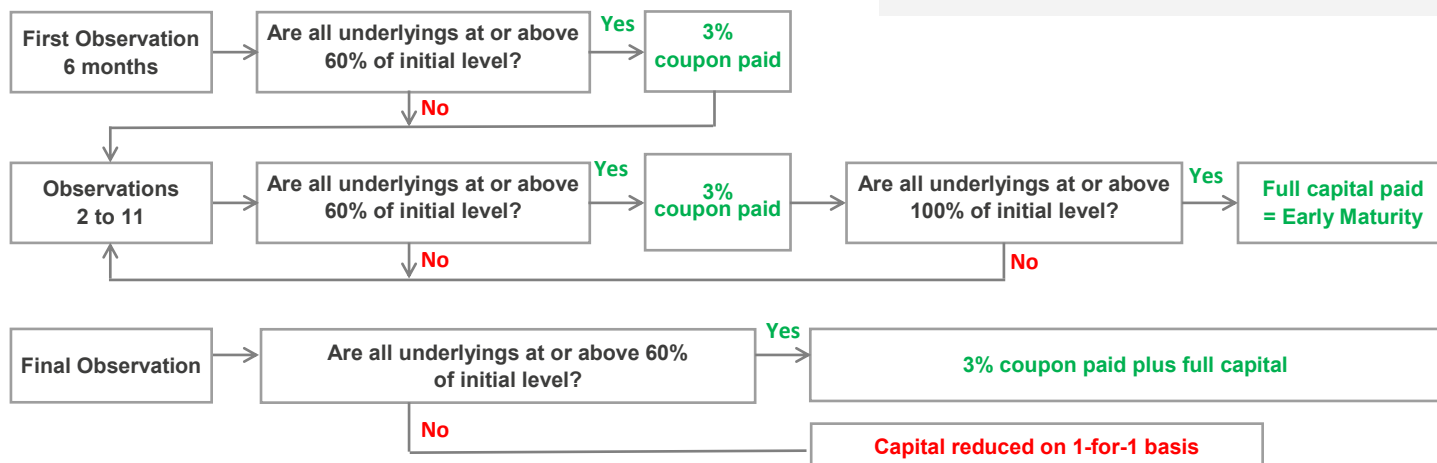

RISKS

- The return is limited to the pre-defined investment terms
- The income payment is conditional upon the underlying performance
- There is a risk to capital should one of the underlyings breach the barrier or the issuer default

Natixis: Natixis SA offers corporate, investment and financial services. The Bank services companies, financial institutions and institutional investors. Natixis offers wholesale banking in the form of advising and financing, investment solutions in the form of asset management, insurance, private banking and private equity, as well as other specialised financial services.

Subscription Period:	23 Aug 2016 – 14 Sept 2016 (4.30pm UK Time)

KEY DATES

Strike Date:	19 September 2016
Final Observation:	19 September 2022
Maturity Date:	26 September 2022
Currency:	GBP
ISIN:	XS1373377974

SUITABILITY

May be suitable for investors who:

- are seeking the opportunity for higher returns than current cash rates
- understand the impact of global economic issues
- understand and accept there is a risk to capital
- understand the criteria which will determine the income payment
- are looking to invest for the medium or long term, being happy to remain invested until maturity
- may be slightly bearish on equity markets but require an opportunity to receive the income should a bear market occur
- wish to use this investment as part of a well-diversified portfolio
- understand that the returns are pre-defined and that they will forgo growth in the underlyings which exceed that fixed level
- understand the risk to capital in the event of counterparty default
- should they need to sell their investment, accept that the trading price will likely mean they get back less than they invested

RATIONALE

The opportunity for an income stream is of key importance to investors as part of their wealth planning. The probability of an income payment being triggered is increased with this investment as an underlying needs to show a fall of 40% from the initial level on any observation date before the income stream is disrupted.

These four markets have been selected in order to support the anticipated delivery of that income.

Using the autocall payoff can bring an early return of capital allowing the opportunity for a re-assessment of investment strategy. The value of this feature cannot be underestimated as it brings with it the opportunity to “lock in” gains, as well as the chance to take advantage of future market trends.

To manage the capital risk, a final level barrier set at 60% offers re-assurance to the more cautious investor.

THE UNDERLYINGS

The **S&P/ASX 200 Index** (AS51) measures the performance of the 200 largest index-eligible stocks listed on the ASX by float-adjusted market capitalization. Representative liquid and tradable, it is widely considered Australia's preeminent benchmark index.

The **FTSE100 Index** (UKX) is a capitalisation-weighted index of the 100 most highly capitalized companies traded on the London Stock Exchange. The equities use an investibility weighting in the index calculation. The index was developed with a base level of 1000 as of December 30, 1983.

The **Russell 2000 Index** (RTY) is comprised of the smallest 2000 companies in the Russell 3000 Index, representing approximately 8% of the Russell 3000 total market capitalization. The index was developed with a base value of 135.00 as of December 31, 1986

The **Hang Seng China Enterprises Index** (HSCEI) is a free-float capitalization-weighted index comprised of H-Shares listed on the Hong Kong Stock Exchange and included in the Hang Seng Mainland Composite Index. The base value of this index is 2000 as of Jan 3, 2000.
