Publication Date : 19/04/2018

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

It is a bond for which the Client pays a purchase amount and the Issuer assumes, on the Maturity Date, the obligation to pay part of the Nominal amount of the bond or all the Nominal amount of the bond ("**Nominal Amount**"), depending on the evolution of one or several Underlying Assets, with no commitment of paying back the whole Nominal Amount. Furthermore, the product grants to its holders the right to receive a Payout (as defined below), provided that certain conditions related to the evolution of one or more Underlying Assets are met.

Objectives

The Payout and the payment of the Nominal Amount will depend on the fulfillment of certain conditions, related to the performance of the Worst Underlying Asset on the Reference Date, the Final Reference Date and the Barrier Observation Date:

- a) If, on a Reference Date or on the Final Reference Date, the Worst Underlying Asset is higher than or equal to the Trigger, the Product will redeem and the Issuer will pay the Nominal Amount for each bond and, in addition, will settle a Payout for each bond equal to the result of the following formula:

$$\text{Nominal Amount} \times \text{Coupon} \times n$$

- b) If, on the Final Reference Date, the Value of the Worst Underlying Asset is lower than the Trigger, the Issuer will settle no Payout and regarding the payment of the Nominal Amount:
 - (i) if the Barrier Activation Condition has not been verified, the Issuer will pay the Nominal Amount for each bond;
 - (ii) if the Barrier Activation Condition has been verified, the Issuer will pay a portion of the Nominal Amount for each bond equal to the following formula:

$$\text{Nominal Amount} \times \text{Value of the Worst Underlying Asset} / \text{Strike}$$

In such a situation it may occur that **the Nominal Amount will not be returned.**

Underlying Assets: UKX, AS51 IND and HSCEI IND

Barrier Activation Condition: if, at any of the Barrier Observation Dates the closing price of the Worst Underlying Asset is lower than the Barrier Level.

Coupon: 2.5%

Barrier Observation Dates: 06/06/2024, unless the product expires before the date, as mentioned before.

Reference Dates: 06/09/2018, 06/12/2018, 06/03/2019, 06/06/2019, 06/09/2019, 06/12/2019, 06/03/2020, 08/06/2020, 04/09/2020, 07/12/2020, 08/03/2021, 07/06/2021, 03/09/2021, 06/12/2021, 07/03/2022, 06/06/2022, 06/09/2022, 06/12/2022, 06/03/2023, 06/06/2023, 06/09/2023, 06/12/2023, 06/03/2024 and 06/06/2024

Final Reference Date: 06/06/2024

Maturity Date: 13/06/2024

Nominal Amount: GBP 1,000

n: order number of the Reference Date or Final Reference Date

Barrier Level: 70% of the strike

Worst Underlying Asset: the Underlying Asset with the lowest result (that is, closest to zero) from dividing the Value of the Underlying Asset by its Strike on the corresponding date.

Strike: Closing Price of the Underlying Asset on 06/06/2018

Trigger: 90% of the strike

Value of the Worst Underlying Asset: Closing Price of the Worst Underlying Asset on each Reference Date

Intended retail investor

- This product category is mainly designed for investors who:
- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
 - Investors are seeking to preserve capital or are willing to accept a loss limited to a level specified by the product.
 - Investors are able to hold the product for the Recommended Holding Period (RHP)
 - Investors are seeking Growth Investment and/or Hedging

What are the risks and what could I get in return?

Summary Risk Indicator

The risk indicator assumes you keep the product for 6 years until date 13 June, 2024. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra cost to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Investment GBP 10,000

Scenarios		1 year	3 years	6 years final maturity
Stress scenario	What you might get back after costs	GBP 8,109	GBP7,374	GBP4,168
	Average return each year	-18.91%	-9.66%	-13.57%
Unfavourable scenario	What you might get back after costs	GBP10,345	GBP10,620	GBP11,140
	Average return each year	3.45%	2.03%	1.82%
Moderate scenario	What you might get back after costs	GBP 10,345	GBP10,620	GBP11,140
	Average return each year	3.45%	2.03%	1.82%
Favourable scenario	What you might get back after costs	GBP 10,345	GBP10,620	GBP11,382
	Average return each year	3.45%	2.03%	2.18%

This table shows the money you could get back over the next 6 years under different scenarios, assuming that you invest GBP 10,000. The scenarios show and illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Issuer is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations assumed by the Issuer in the Product, in their terms. The Product is not covered by the Deposit Guarantee Scheme of Credit Institutions nor by any other guarantee scheme. In the event that BBVA as guarantor can not pay, the Client would face a loss of capital.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 GBP. The figures are estimates and may change in the future.

Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment GBP 10,000

Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the recommended holding period
Total costs	GBP 935.12	GBP 895.78	GBP 887.25
Impact on return (RIY) per year	1.48%	1.48%	1.48%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might receive at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.48%	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in section II.

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

The Product does not allow cancellation or a refund in advance. The Client may sell the Product before its Maturity Date, provided there is liquidity in the market. In that case, the Client will not be entitled to Compensation and may suffer a loss if the selling price is less than the Amount Invested.

How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: servicioatencioncliente@grupobbva.com. Telephone: 900 812 679.
