Publication Date : 19/07/2018

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

It is a bond for which the Client pays a purchase amount and the Issuer assumes, on the Maturity Date, the obligation to pay part of the Nominal amount of the bond or all the Nominal amount of the bond ("Nominal Amount"), depending on the evolution of one or several Underlying Assets, with no commitment of paying back the whole Nominal Amount. Furthermore, the product grants to its holders the right to receive a Payout (as defined below), provided that certain conditions related to the evolution of one or more Underlying Assets are met.

Objectives

The Payout and the payment of the Nominal Amount depend on the fulfilment of certain conditions, related to the performance of the Worst Underlying Asset

- Payout

If, on a Reference Date or the Final Reference Date, the Value of the Worst Underlying Asset is higher than or equal to the Coupon Trigger, the Issuer settles a Payout equal to Nominal Amount x Coupon for each bond.
In all other cases, the Issuer does not settle any Payout.

- Payment of the Nominal Amount
- a) If on a Redemption Reference Date or the Final Reference Date, the Value of the Worst Underlying Asset is higher than or equal to the Trigger, the product redeems and the Issuer pays the Nominal Amount for each bond.
- b) If on the Final Reference Date, the Value of the Worst Underlying Asset is lower than the Trigger and the Barrier Activation Condition has not been verified, the Issuer pays the Nominal Amount for each bond.
- c) If on the Final Reference Date, the Value of the Worst Underlying Asset is lower than the Trigger and the Barrier Activation Condition has been verified, the Issuer pays a portion of the Nominal Amount for each bond equal to the following formula:

$$\text{Nominal Amount} \times \text{Value of the Worst Underlying Asset} / \text{Strike}$$

In this situation, **the Nominal Amount may not be returned.**

Underlying Assets: UKX, HANG SENG INDEX and IBEX 35 INDEX

Coupon: 5%

Reference Dates: 11/02/2019, 09/08/2019, 10/02/2020, 10/08/2020, 08/02/2021, 09/08/2021, 09/02/2022, 09/08/2022, 09/02/2023, 09/08/2023, 09/02/2024 and 09/08/2024

Maturity Date: 16/08/2024, unless the product expires before the date, as mentioned before.

Barrier Level: 70% of the Strike

Strike: Closing Price of the Underlying Assets on the date 09/08/2018

Nominal Amount: USD 2,000

Trigger: 100% of the Strike

Coupon Trigger: 80% of the Strike

Final Reference Date: 09/08/2024

Redemption Reference Dates: 10/08/2020, 08/02/2021, 09/08/2021, 09/02/2022, 09/08/2022, 09/02/2023, 09/08/2023 and 09/02/2024,

Barrier Observation Dates: 09/08/2024, unless the product expires before the date, as mentioned before.

Value of the Worst Underlying Asset: Closing price of the Worst Underlying Asset on each Reference Date

Barrier Activation Condition: if, at any of the Barrier Observation Dates the closing price of the Worst Underlying Asset is lower than the Barrier Level.

Worst Underlying Asset: the Underlying Asset with the lowest result (that is, closest to zero) from dividing the Value of the Underlying Asset by its Strike on the corresponding date.

Intended retail investor

This product category is mainly designed for investors who:

- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
- Investors are seeking to preserve capital or are willing to accept a loss limited to a level specified by the product.
- Investors are able to hold the product for the Recommended Holding Period (RHP)
- Investors are seeking Growth Investment and/or Hedging

What are the risks and what could I get in return?

Summary Risk Indicator

The risk indicator assumes you keep the product for 6 years until date 16 August, 2024. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra cost to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Investment USD 10,000				
Scenarios		1 year	3 years	6 years final maturity
Stress scenario	What you might get back after costs	USD 5,437	USD6,010	USD3,852
	Average return each year	-45.63%	-15.61%	-14.70%
Unfavourable scenario	What you might get back after costs	USD11,049	USD11,402	USD10,045
	Average return each year	10.49%	4.47%	0.08%
Moderate scenario	What you might get back after costs	USD 11,482	USD11,824	USD13,492
	Average return each year	14.82%	5.74%	5.12%
Favourable scenario	What you might get back after costs	USD 11,578	USD12,894	USD15,401
	Average return each year	15.78%	8.84%	7.46%

This table shows the money you could get back over the next 6 under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Issuer is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations assumed by the Issuer in the Product, in their terms. The Product is not covered by the Deposit Guarantee Scheme of Credit Institutions nor by any other guarantee scheme. In the event that BBVA as guarantor can not pay, the Client would face a loss of capital.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 USD. The figures are estimates and may change in the future.

Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment USD 10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the recommended holding period
Total costs	USD 1,337.03	USD 1,186.41	USD 1,168.36
Impact on return (RIY) per year	13.37%	3.95%	1.95%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might receive at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.95%	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in section II.

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

The Product does not allow cancellation or a refund in advance. The Client may sell the Product before its Maturity Date, provided there is liquidity in the market. In that case, the Client will not be entitled to Compensation and may suffer a loss if the selling price is less than the Amount Invested.

How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: servicioatencioncliente@grupobbva.com. Telephone: 900 812 679. Web: <https://www.bbva.es/sistema/meta/calidad.jsp> For claims related to the sale of or advice about this Product by an entity different from BBVA, contact the entity which sold you or advised you about the Product.
