

BNP Paribas

3 Year Oil & Gas Sector Monthly Autocall July 2020

Factsheet

INVESTMENT DESCRIPTION

A 3 year investment linked to the performance of the SPDR S&P Oil & Gas Exploration & Production ETF.

If on any monthly observation date (including the Final Observation date), starting at 3 months, the Underlying is at or above the Autocall Trigger, the investment will autocall. Initial capital plus the coupon for each monthly period which has elapsed is paid and the investment will end.

If the investment does not autocall then at the Final Observation date, if the Underlying is at or above 60% of its initial levels, full capital is returned.

If the Underlying is below 60% of its original level on the Final Observation date, capital return will be reduced on a 1-for-1 basis. For example if the Underlying has fallen to 40% of its original level, 40% of the capital will be returned.

BENEFITS

- Autocall feature potentially shortens the investment term and is triggered by minimal market growth.
- Snowballing coupon.
- Early maturity provides an opportunity to re-assess client's wealth strategy.
- Minimal market growth needed to deliver enhanced returns.
- Daily pricing.

RISKS

- The return is limited to the pre-defined investment terms.
- The coupon payment is conditional upon the Underlying performance.
- Investors will be exposed to the credit risk of the Issuer. If the Issuer becomes insolvent or cannot make the payments on the Product for any other reason, investors could lose some or all of their investment. A decline in the Issuer's credit quality is likely to reduce the market value of the Product and therefore the price an investor may receive for the Product if they were to sell it in the market.
- Should investors need to sell their investment before maturity, the trading price will likely mean they get back less than they invested.

RATIONALE

Structured products are becoming increasingly popular for investors due to the wide variety of payoffs and levels of protection that can be achieved by the different types of structures that are available.

Autocalls have been one of the most popular structures over the years. With a classic autocall, returns are paid if the Underlying is at or above the Autocall Trigger on an observation date.

The Underlying has been selected in order to support the anticipated delivery of the coupons.

The autocall payoff can bring an early return of capital allowing the opportunity for a re-assessment of investment strategy. The value of this feature cannot be underestimated as it brings with it the opportunity to secure capital value, as well as the chance to take advantage of future market trends.

To manage the capital risk, a final level barrier set at 60% means the Underlying must fall by more than 40% over 3 years before capital is at risk.

SUITABILITY

This product may be suitable for investors who:

- Are seeking the opportunity for higher returns than current cash rates at the time this product was launched.
- Are seeking growth rather than income.
- Understand and accept there is a risk to capital and how the Capital Protection Barrier works.
- Understand the impact of global economic issues and how they will affect the product.
- Understand the criteria which will determine the coupon payments.
- Are looking to invest for the short term, being happy to remain invested until maturity, and understand the risks associated with this strategy.
- Can afford to have their cash invested for the full term of the Product.
- Wish to use this investment as part of a well-diversified portfolio.
- Understand that the returns are pre-defined and that they will forgo any growth in the Underlying which exceeds the fixed level available with this investment product.
- Understand the risk to capital in the event of a counterparty default.
- Should they need to sell their investment before maturity, accept that the trading price will likely mean they get back less than they invested.

Secondary Market

The Issuing bank will endeavour to provide quotes under normal market conditions for trading purposes upon request, subject to a Bid-Offer spread of 1%. On the secondary market, traded prices will include any accrued interest ("dirty prices").

Sale trades will settle 2 days after the trade date. Trade orders should be sent to orders@idad.com.

All trades will be settled direct with IDAD's Euroclear a/c 44382
