Competent authority: For BBVA: Comisión Nacional del Mercado de Valores. For the Issuer: Autoriteit Financiële Markten (AFM)  
Publication Date: 16/11/2020

Contact Data: Web: [www.bbva.es](http://www.bbva.es)  
For more information call +34 902 224 466 / +34 912 249 426

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

It is a bond for which the Client pays a purchase amount and the Issuer assumes, on the Maturity Date, the obligation to pay part of the Nominal amount of the bond or all the Nominal amount of the bond ("**Nominal Amount**"), depending on the evolution of one or several Underlying Assets, with no commitment of paying back the whole Nominal Amount. Furthermore, the product grants to its holders the right to receive a Payout (as defined below), provided that certain conditions related to the evolution of one or more Underlying Assets are met.

### Objectives

The Payout and the payment of the Nominal Amount will depend on the fulfillment of certain conditions, related to the performance of the Worst Underlying Asset on the Reference Date, the Final Reference Date and the Barrier Observation Date:

- a) If, on a Reference Date or on the Final Reference Date, the Value of the Worst Underlying Asset is higher than or equal to the Trigger, the Product will redeem and the Issuer will pay the Nominal Amount for each bond and, in addition, will settle a Payout for each bond equal to the result of the following formula:

$$\text{Nominal Amount} \times \text{Coupon}$$

- b) If, on the Final Reference Date, the Value of the Worst Underlying Asset is lower than the Trigger, the Issuer will settle no Payout and regarding the payment of the Nominal Amount:
  - (i) if the Barrier Activation Condition has not been verified, the Issuer will pay the Nominal Amount for each bond;
  - (ii) if the Barrier Activation Condition has been verified, the Issuer will pay a portion of the Nominal Amount for each bond equal to the following formula:

$$\text{Nominal Amount} \times \text{Value of the Worst Underlying Asset} / \text{Strike}$$

In such a situation it may occur that **the Nominal Amount will not be returned.**

**Underlying Assets:** EUROSTOXX50 IND, SEK-OMX INDEX, TORONTO STOCK EXCHANGE 60 and SWISS MARKET IND

**Barrier Activation Condition:** if, at any of the Barrier Observation Dates the closing price of the Worst Underlying Asset is lower than the Barrier Level.

**Coupon:** 8%, 12%, 16%, 20%, 24%, 28%, 32%, 36%, 40%, 44%, 48%

**Barrier Observation Dates:** 03/12/2026, unless the product expires before the date, as mentioned before.

**Reference Dates:** 03/12/2021, 03/06/2022, 05/12/2022, 05/06/2023, 04/12/2023, 03/06/2024, 03/12/2024, 03/06/2025, 03/12/2025, 03/06/2026 and 03/12/2026

**Final Reference Date:** 03/12/2026

**Maturity Date:** 10/12/2026

**Nominal Amount:** USD 1,000

**Barrier Level:** 60% of the strike

**Worst Underlying Asset:** the Underlying Asset with the lowest result (that is, closest to zero) from dividing the Value of the Underlying Asset by its Strike on the corresponding date.

**Strike:** Closing Price of the Underlying Asset on 03/12/2020

**Trigger:** 100% of the Strike

**Value of the Worst Underlying Asset:** Closing Price of the Worst Underlying Asset on each Reference Date

**Intended  
retail  
investor**

- This product category is mainly designed for investors who:
- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
  - Investors are willing to accept there is no capital guarantee nor protection. 100% of capital invested is at risk.
  - are able to hold the product until the 10/12/2026
  - Investors whose aim is to achieve return and/or hedging linked to share performance

## What are the risks and what could I get in return?

### Summary Risk Indicator

The risk indicator assumes you keep the product for 5 years , 11 months and 29 days; until the date 10 December 2026. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay a significant extra cost to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is 5 a medium - high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment USD 10,000				
Scenarios		1 year	3 years	5 years , 11 months and 29 days final maturity
Stress scenario	What you might get back after costs	USD 3,207	USD 4,835	USD 2,450
	Average return each year	-67.94%	-21.52%	-20.90%
Unfavourable scenario	What you might get back after costs	USD 9,697	USD 10,321	USD 10,000
	Average return each year	-3.03%	1.06%	0.00%
Moderate scenario	What you might get back after costs	USD 10,689	USD 10,863	USD 11,118
	Average return each year	6.89%	2.80%	1.78%
Favourable scenario	What you might get back after costs	USD 10,800	USD 11,644	USD 13,068
	Average return each year	8.00%	5.20%	4.56%

This table shows the money you could get back over the next 5 years , 11 months and 29 days, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has chosen to capitalize on these payments, assuming a reinvestment until maturity at a risk-free rate of interest.

## What happens if the Issuer is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, the Client would face a financial loss.

In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, the Client could make losses in their investment.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 USD. The figures are estimates and may change in the future.

### Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment USD 10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the recommended holding period
Total costs	USD 965.11	USD 901.44	USD 886.11
Impact on return (RIY) per year	9.65%	3.00%	1.48%

## Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might receive at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.48%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in section II.

## How long should I hold it and can I take money out early?

### Recommended Holding Period: 5 years , 11 months and 29 days

The Product does not allow cancellation or a refund in advance. The Client may sell the Product before its Maturity Date, provided there is liquidity in the market. In that case, the Client will not be entitled to Compensation and may suffer a loss if the selling price is less than the Amount Invested.

## How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: [servicioatencioncliente@grupobbva.com](mailto:servicioatencioncliente@grupobbva.com). Telephone: 900 812 679.
