

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

Product name: Phoenix with ISIN Code - XS2378607217  
(The "Product")

Competent authority: For BBVA: Comisión Nacional del Mercado de Valores. For the Issuer: Autoriteit Financiële Markten (AFM)

Publication Date: 30/05/2022

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

**This Product is a structured bond.** The Customer acquires the Product by paying an amount ("Acquisition Amount") and the Issuer assumes the obligation to pay the Customer part or all of the nominal amount of the bond ("Nominal Amount") on the **Maturity Date**, depending on the performance of one or more Underlying Assets on certain dates (the "Reference Date(s)"). The Product grants the Customer the right to receive Remuneration if the conditions linked to the performance of one or more Underlying Assets are met. The Customer may lose the total investment.

### Objectives

The Product has been designed so that, in exchange for payment of the Acquisition Amount, the Customer obtains payment of a Remuneration and a cash payment when Product falls due. The term and amount of these payments will depend on the performance of the Underlying Assets.

#### A. Remuneration

If on a Reference Date or 29/06/2026 (the "Final Reference Date"), the Value of the Worst Underlying Asset is greater than or equal to the Trigger of the Coupon, on the applicable Settlement Date, the Issuer shall pay the Customer: (i) a Remuneration for each bond equal to the Nominal Amount x Coupon.

In any other case, the Issuer will not pay Remuneration to the Client.

#### B. Refund of the Nominal Amount

a) If on a Redemption Reference Date or on the Final Reference Date, the Value of the Worst Underlying Asset is greater than or equal to the Trigger, the Product will mature on the applicable Settlement Date and the Issuer will return the entire Nominal Amount of each bond to the Customer.

b) If on the Final Reference Date, the Value of the Worst Underlying Asset is less than the Trigger and the Barrier Activation Condition has not been verified, the Issuer will refund the entire Nominal Amount of each bond on the last Settlement Date.

c) If on the Final Reference Date, the Value of the Worst Underlying Asset is less than the Trigger and the Barrier Activation Condition has been verified, on the last Settlement Date, the Issuer will refund the customer for each bond the portion of the Nominal Amount resulting from the following formula: Nominal Amount x Value of the Worst Underlying Asset / Strike

In this situation, it may happen that the Nominal Amount is not refunded.

With this Product the Client seeks to benefit by receiving a remuneration when there is a performance of the Underlying Assets above the Trigger of the Coupon in exchange for waiving the refund of the entire Nominal Amount per bond in the case the Barrier Activation Condition is verified and the Value of the Underlying Assets are lower than the Trigger.

**Underlying Assets:** Amazon.com Inc, WAYFAIR INC- CLASS A, ETSY US EQUITY and PayPal Holdings Inc

**Barrier:** 50% of the Strike. This is the limit value established to compare it with the Value of the Underlying and check whether the refund of the Nominal Amount to the Customer of each bond is total or there will be a loss.

**Barrier Activation Condition:** If on any Barrier Observation Date the closing price of the Worst Underlying Asset is below the Barrier level.

**Coupon:** 3%. It is the percentage applicable to the Nominal Amount as remuneration, which the Customer receives on the corresponding dates.

**Settlement Dates:** 5 business days after the corresponding Reference Date.

**Barrier Observation Date:** 29/06/2026, unless the product expires before the date, as mentioned before.

**Reference Dates:** these will be quarterly from 29/09/2022 to 29/06/2026, both included.

**Redemption Reference Dates:** these will be quarterly from 29/06/2023 to 29/06/2026, both included.

**Maturity Date:** 06/07/2026, unless the product expires before the date, as mentioned before.

**Acquisition Amount:** amount that the Customer disburses to acquire the Product. It may not match the Nominal Amount.

**Nominal Amount:** USD 1,000: denomination of the bonds in a monetary unit on the issue date.

**Worst Underlying Asset:** that Underlying Asset for which, on the corresponding date, the result of dividing the Value of the Underlying Asset by its Strike is a lowest amount (i.e., closer to 0).

**Strike:** Closing Price of the Underlying Assets on the date 28/06/2022.

**Trigger:** 100% of the Strike. It is the limit value established to compare it with the Underlying Asset Value and check if the note automatically

early redeems.

**Coupon Trigger:** 0% of Strike. It is the limit value for the Coupon to be paid.

**Value of the Worst Underlying Asset:** Closing Price of the Worst Underlying Asset on each Reference Date.

**Intended  
retail  
investor**

This product category is mainly designed for investors who:

- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
- Investors are willing to accept there is nor capital guarantee nor protection. 100% of capital invested is at risk.
- are able to hold the product until the 06/07/2026
- Investors whose aim is to achieve return and/or hedging linked to share performance

## What are the risks and what could I get in return?

### Summary Risk Indicator

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 4 years and 1 day; until the date 6 July 2026.

The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay a significant extra cost to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is 4 a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

If (we) (are) not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Scenarios		1 year	2 years	4 years and 1 day final maturity
Stress scenario	What you might get back after costs	USD 2,698	USD 4,933	USD 5,165
	Average return each year	-73.02%	-29.75%	-15.22%
Unfavourable scenario	What you might get back after costs	USD 9,934	USD 10,228	USD 7,014
	Average return each year	-0.66%	1.13%	-8.48%
Moderate scenario	What you might get back after costs	USD 10,765	USD 11,522	USD 12,155
	Average return each year	7.65%	7.33%	5.00%
Favourable scenario	What you might get back after costs	USD 11,213	USD 11,992	USD 15,051
	Average return each year	12.13%	9.50%	10.75%

This table shows the money you could get back over the next 4 years and 1 day, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has chosen to capitalize on these payments, assuming a reinvestment until maturity at a risk-free rate of interest.

## What happens if the Issuer is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, the Client would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, the Client could make losses in their investment.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 USD. The figures are estimates and may change in the future.

### Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment USD 10,000			
Scenarios	If you cash in after 1 year	If you cash in after 2 years	If you cash in at the end of the recommended holding period
Total costs	USD 1,530.78	USD 1,395.15	USD 1,344.19
Impact on return (RIY) per year	15.31%	6.98%	3.36%

### Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might receive at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	3.36%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in section II.

## How long should I hold it and can I take money out early?

### Recommended Holding Period: 4 years and 1 day

This Product doesn't allow the Client to cancel his investment. However, under normal market conditions, BBVA may facilitate to the client the price at which BBVA is able to buy it. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 0.75% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

### How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: 900 812 679. Web:
