

# BARCLAYS CAPITAL PROTECTED AUTOCALL

MAY 2023 FACTSHEET

**TARGET RETURN: GBP = 7.30% p.a.**

## INVESTMENT DESCRIPTION

A 6 year investment linked to the performance of UK, US and Japanese Indices.

If on any semi-annual observation date (including the Final Observation date), starting at 36 months, all of the Underlyings are at or above the Autocall Trigger, the investment will autocall. Initial capital plus the Coupon Rate for each semi-annual period which has elapsed is paid and the investment will end.

The Product is 100% Capital Protected so full capital will be returned to investors at maturity irrespective of the performance of the Underlying.

## BENEFITS

- Autocall feature potentially shortens the investment term and is triggered by minimal market growth.
- Snowballing coupon.
- 100% Capital Protected at maturity.
- Early maturity provides an opportunity to re-assess client's wealth strategy.
- Daily pricing.

## RISKS

- The return is limited to the pre-defined investment terms.
- The coupon payment is conditional upon the Underlying performance.
- Investors will be exposed to the credit risk of the Issuer. If the Issuer becomes insolvent or cannot make the payments on the Product for any other reason, investors could lose some or all of their investment. A decline in the Issuer's credit quality is likely to reduce the market value of the Product and therefore the price an investor may receive for the Product if they were to sell them in the market.
- Should investors need to sell their investment before maturity, the trading price will likely mean they get back less than they invested.

## RATIONALE

Structured products are becoming increasingly popular for investors due to the wide variety of payoffs and levels of protection that can be achieved by the different types of structures that are available.

Autocalls have been one of the most popular structures over the years. With a classic autocall, returns are paid if all Underlyings are at or above the Autocall Trigger on an observation date.

The Underlyings detailed overleaf have been selected in order to support the anticipated delivery of the coupons.

The autocall payoff can bring an early return of capital allowing the opportunity for a re-assessment of investment strategy. The value of this feature cannot be underestimated as it brings with it the opportunity to secure capital value, as well as the chance to take advantage of future market trends.

The Product is 100% Capital Protected so full capital will be returned to investors at maturity irrespective of the performance of the Underlying.
