EURO STOXX 50®	EU0009658145	STOXX Limited	EUR	25%

Type

This product is an unsecured debt instrument governed by English law.

Objectives

This product is a fixed term investment designed to provide a conditional coupon on a periodic basis. Both the coupon and the capital redemption amount are linked to the performance of the underlyings. Your capital will be at risk when investing in this product.

The product is a fixed term investment which is designed to generate a payoff at maturity linked to the performance of the Reference Underlying. The product also provides a potential coupon, which is conditional on the performance of the worst performing underlying. Your capital will be at risk when investing in this product.

The Reference Underlying is an equally weighted basket composed of the underlyings.

Coupon

- Otherwise, you will not receive the Coupon.

Final Redemption

On the Maturity Date, you will receive a final redemption amount.

- If the Final Level of the Reference Underlying is at or above its Initial Level (100%), you will receive:

(1) 50% of the Nominal Value, plus

(2) The performance of the Reference Underlying multiplied by the Participation and capped at the Cap level.

- Otherwise, you will receive 50% of the Nominal Value.

Additional Information

- The level of the Reference Underlying is calculated as 100% plus the average performance of the underlyings, where the performance of each Underlying (which can be positive or negative) is calculated as a percentage of its Initial Value.

- The Initial Value of each Underlying is its value observed on the Initial Observation Date.

- The Final Level is the level of the Reference Underlying observed on the Final Observation Date.

- The performance of the Reference Underlying is calculated as its Final Level minus 100%. The performance is multiplied by the Nominal Value.

- Coupons are expressed as a percentage of the Nominal Value.

- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment

Intended Retail Investor

The product is aimed at investors who:

- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering income and have an investment horizon in line with the recommended holding period stated below.
- Are able to bear a partial loss, or total loss of their investment and any potential return in case of default of the Issuer and / or Guarantor.
- Understand that the minimum reimbursement only applies at maturity and they could receive less than this amount if the product is sold beforehand.
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 50% of your capital (where "capital" means Nominal Value and not invested amount). Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before the Maturity Date.

If we are not able to pay you what is owed, you could lose your entire investment.

Investment Performance Information

Factors affecting the product performance

The main factors that could affect the performance of the product is the performance of the underlying instrument(s) along with Société Générale (the Guarantor) creditworthiness, which could have a material impact on the return, for instance if Société Générale (the Guarantor) is unable to pay out the redemption amount.

Some other factors (such as the remaining time to the redemption date, interest rates, exchange rates, credit spreads, the dividend yield of the underlying where applicable, and in the case of multiple underlyings, the correlation between the various underlyings) could also affect the overall performance of the product on the secondary market.

There is no relevant index, benchmark or proxy which historical performance can be compared to the potential future performance of this structured product.

What could affect my returns?

The potential yield of the product at maturity will depend, in particular, on the scenario of evolution, until maturity of the product, of the factors that may affect its performance, mentioned above.

In a favorable scenario, if you hold the product to maturity or, (where applicable) until it early redeems, you might expect a return of 3.46% per annum.

In a moderate scenario, you might expect a return of 3.46% per annum.

In an unfavorable scenario, you will lose money, up to a maximum of 50% of your initial investment. You might expect a return of 1.61% per annum based on an estimate of future performance. This case occurs when the underlying performs negatively, i.e. falls compared to its reference level in the product.

For the three scenarios above, if the manufacturer is not able to meet its obligation, you will have a negative return and could lose the entire initial amount.

Outcomes in severely adverse market conditions

In severely adverse market conditions, the product may undergo major price movements until its maturity which, in the worst case scenario, may cause its value at maturity falling to 50%.

If the product incorporates a leverage effect, the variation of its price will be amplified and a price drop strongly accelerated.

At maturity of the product you may have lost 50% of the initial amount you invested in the product if the underlying asset of the product has suffered a sharp decline in its value until this date. This does not take into account the situation where the manufacturer is not able to meet its obligation.

All expected return figures presented in this section result from statistical calculations in accordance with the methodology prescribed under the PRIIP Regulation. They do not represent the return you will receive in each scenario but only a probability of return.

WHAT HAPPENS IF SOCIÉTÉ GÉNÉRALE IS UNABLE TO PAY OUT?

If the Issuer defaults you may only claim any unpaid amount from Société Générale (the Guarantor). Should Société Générale default or file for bankruptcy, you may suffer a partial or total loss of the invested amount. If the Issuer and/or the Guarantor becomes subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. Please be aware that your Investment is not covered by any investor compensation or guarantee scheme.

Please find the ratings of Société Générale at <https://investors.societegenerale.com/en/financial-and-non-financial-information/ratings/credit-ratings>.

WHAT ARE THE COSTS?

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment GBP 10,000.00			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the Recommended Holding Period
Total costs	GBP 962.62	GBP 1,078.73	GBP 1,147.26
Impact on return (RIY) per year	9.60%	3.28%	1.55%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.55%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs taken each year	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 6 years, which corresponds to the product maturity.

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices expressed as percentages of the Nominal Value and the difference between the bid and offer prices (the spread) will not be more than 1.00% of such Nominal Value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIÉTÉ GÉNÉRALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (<http://kid.sgmarkets.com>).
