4 YEAR FIXED INCOME

OCTOBER 2024 FACTSHEET

TARGET RETURN: USD = 6.55% p.a.

INVESTMENT DESCRIPTION

A 4 year investment linked to the performance of European, US, UK and Japanese indices.

This product will pay a fixed (guaranteed) coupon on the Annual payment dates until maturity, irrespective of the performance of the Underlying Indices.

At the Final Observation date, if the all Underlyings are at or above the Capital Protection Barrier, then full capital is returned. If any Underlying is below the Capital Protection Barrier, capital return will be reduced on a 1-for-1 basis. For example, if the Underlying has fallen to 40% of its original level, 40% of the capital will be returned.

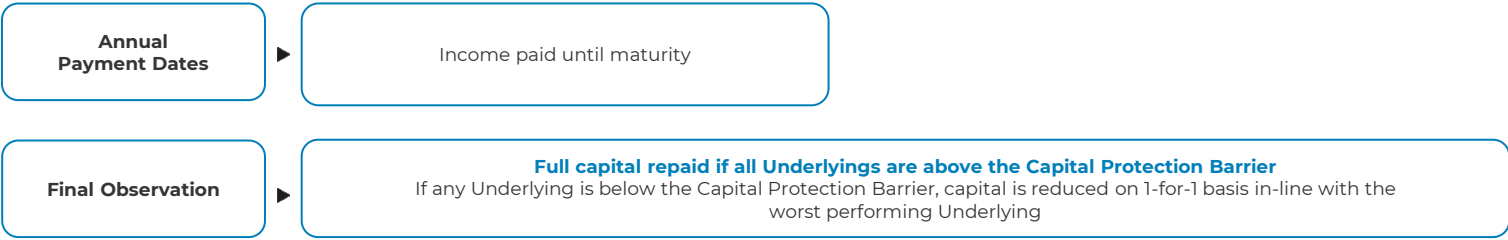

BENEFITS

- Opportunity for regular income payments.
- Coupons are guaranteed and are not dependant on the performance of the Underlyings.
- Deep Capital Protection Barrier.
- Daily pricing.

RISKS

- The return is limited to the pre-defined investment terms.
- Investors will be exposed to the credit risk of the Issuer. If the Issuer becomes insolvent or cannot make the payments on the Product for any other reason, investors could lose some or all of their investment. A decline in the Issuers credit quality is likely to reduce the market value of the Product and therefore the price an investor may receive for the Product if they were to sell them in the market.
- There is a risk to capital should any Underlying breach the Capital Protection Barrier on its Final Observation date.
- Should investors need to sell their investment before maturity, the trading price will likely mean they get back less than they invested.

This 12 year back-test shows the historical data for a full 8 years of 4 year products that could reach the full term. RATIONALE

Structured products are becoming increasingly popular for investors due to the wide variety of payoffs and levels of protection that can be achieved by the different types of structures that are available.

The opportunity for an income stream can be of key importance to investors as part of their wealth planning.

Having a fixed coupon rather than conditional coupon means the investor can plan other investments knowing that these coupons are guaranteed.

To manage the capital risk, a final level barrier set at 60% means an Underlying must fall by more than 40% over the full term before capital is at risk.

SUITABILITY

This product may be suitable for investors who:

- Are seeking the opportunity for higher returns than current cash rates at the time this product was launched.
- Are seeking income rather than growth.
- Understand and accept there is a risk to capital and how the Capital Protection Barrier works.
- Understand the impact of global economic issues and how they will affect the product.
- Are looking to invest for the medium term, being happy to remain invested until maturity.
- Can afford to have their cash invested for the full term of the Product.
- Wish to use this investment as part of a well-diversified portfolio.

- Should they need to sell their investment, accept that the trading price will likely mean they get back less than they invested.
