### Early redemption and adjustments

The terms of the product provide that if certain defined events, in addition to those described above, occur (principally but not exclusively in relation to any Underlying, or the Issuer of the product, which may include the discontinuation of the Issuer's ability to carry out the necessary hedging transactions), adjustments may be made to the terms of the product to account for the relevant event or the product may be early redeemed. The amount paid on any early redemption may be less than the amount originally invested.

### Intended retail investor

This product is intended for retail investors who:

- have capital growth objective
- are willing and able to bear a total capital loss and accept the credit risk of the Issuer and the Guarantor
- have a risk tolerance consistent with the summary risk indicator in this document
- have significant knowledge and experience in products such as the one described in this document
- have a minimum investment horizon consistent with the recommended holding period

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

#### Summary Risk Indicator

*The risk indicator assumes you keep the product until 27 November 2031. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.*

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a medium-high level; and 2) the credit risk which estimates that poor market conditions are very unlikely to impact the capacity of the Issuer and the Guarantor to pay you. **You will receive payments in the product's currency, which may be different from your domestic currency. In this case, be aware of currency risk. The final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If the Issuer and the Guarantor are not able to pay you what is owed, you could lose your entire investment.

#### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		Until the product is called or matures This may be different in each scenario and is indicated in the table	
Example Investment:		GBP 10,000	
Scenarios		If you exit after 1 year	If you exit at call or maturity
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress (product ends after 6 years)	What you might get back after costs	GBP 843	GBP 1,184
	Average return each year	-91.57%	-29.90%
Unfavourable (product ends after 1 year)	What you might get back after costs		GBP 11,080 (Ω)
	Average return each year		10.74% (Ω)
Moderate (product ends after 1 year)	What you might get back after costs		GBP 11,080 (Ω)
	Average return each year		10.74% (Ω)
Favourable (product ends after 3 years)	What you might get back after costs	GBP 12,618	GBP 13,240 (Ω)
	Average return each year	26.18%	9.79% (Ω)

(Ω) In this scenario the product was called early, at the time specified in the scenario. The results shown in the right most column represent the value and return at the early call, without reinvesting the payments.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the reference asset/s past performance over a period of up to 5 past years. Unless expressly stated otherwise, the yields indicated are nominal rates which do not take into account the level of inflation. The actual return may be significantly lower in a high inflation environment.

### WHAT HAPPENS IF NATIXIS IS UNABLE TO PAY OUT?

If the Issuer and the Guarantor become subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. This product is not protected by any investor compensation or guarantee scheme. If the Issuer and the Guarantor are unable to make a payment and/or are in default, you may lose some or all of your invested amount and any payment may be delayed.

### WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- GBP 10,000 is invested.
- A performance of the product that is consistent with each holding period shown.

Investment GBP 10,000	If the product is called at first possible date 27 November 2026	If the product reaches maturity
<b>Total costs</b>	GBP 436	GBP 436
<b>Annual cost impact (*)</b>	5.0% each year	0.8% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 9.48% before costs and 8.67% after costs.

#### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	4.36% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	GBP 436
<b>Exit costs</b>	0.50% of the amount you pay in when exiting this investment. We do not charge an exit fee for this product in case you exit at the Recommended Holding Period or in case of an early call.	GBP 50
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	0.00% of the value of your investment per year. This is an estimate based on actual costs over the last year.	GBP 0
<b>Transaction costs</b>	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	GBP 0
Incidental costs taken under specific conditions		
<b>Performance fees (and carried interest)</b>	There is no performance fee for this product.	GBP 0

#### HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

##### Recommended holding period: 6 years.

The recommended holding period corresponds with the maturity date of the product, as the product is designed to be held until then. Any recommendation regarding the holding period may be irrelevant for a speculative investor. For investors purchasing the product for hedging purposes the holding period depends on the holding period of the underlying risk.

Natixis may provide an indicative price of the product to holders who so request. The spread between the purchase price and the sale price will not be greater than 1%. If you want to sell this product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell. In this case you may sustain a partial or total capital loss. More information available upon request.
