### Underlying

Underlying	Identifier	Relevant Exchange	Currency
NVIDIA CORP	US67066G1040	Nasdaq Stock Exchange	USD
Tesla Inc	US88160R1014	Nasdaq Stock Exchange	USD
ORACLE CORP	US68389X1054	New York Stock Exchange	USD
INTEL CORP	US4581401001	Nasdaq Stock Exchange	USD

### Type

This product is a secured debt instrument governed by English law.

### Term

This product has a life span of 4 years but can be redeemed earlier according to the conditions indicated in the "objectives" section below.

### Objectives

This product is designed to provide a return when the product is redeemed (either at maturity or when redeemed early). It is possible for the product to be automatically redeemed early based on pre-defined conditions. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the underlyings. Your capital will be fully at risk when investing in this product.

The Reference Underlying is the Underlying with the lowest observed level on the relevant observation.

### Automatic Early Redemption

On any Early Redemption Observation Date, if the level of the Reference Underlying is at or above the Early Redemption Barrier, the product will be redeemed early and you will receive, on the Early Redemption Payment Date:

100% of the Nominal Value plus the Early Redemption Coupon multiplied by the number of periods the product has elapsed since inception.

If (1) the level of the Reference Underlying is below the Early Redemption Barrier and (2) an Alternative Early Redemption Event has occurred, the product will be redeemed early and you will receive:

100% of the Nominal Value plus the Alternative Early Redemption Coupon

An Alternative Early Redemption Event occurs if the level of each Underlying has never been observed below the Alternative Early Redemption Barrier on any day during the Alternative Early Redemption Observation Period.

A standard period corresponds to three months. The first or the last period could be either shorter or longer, please refer to the calendar table for more details.

### Final Redemption

On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount.

- If the Final Level of the Reference Underlying is at or above the Final Barrier, you will receive:

100% of the Nominal Value plus the Final Coupon

- If the Final Level of the Reference Underlying is below the Final Barrier and the Final Level of the Reference Underlying is at or above the Capital Barrier, you will receive:

100% of the Nominal Value.

- Otherwise, you will receive the Final Level of the Reference Underlying multiplied by the Nominal Value. In this scenario, you will suffer a partial or total loss of your invested amount.

### Additional Information

- The level of each Underlying corresponds to its value expressed as a percentage of its Initial Value.

- The Initial Value of each Underlying is its value observed on the Initial Observation Date.

- The Final Level is the level of the Reference Underlying observed on the Final Observation Date.

- Coupons are expressed as a percentage of the Nominal Value.

- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment.

## Calendar

Issue Date	11/12/2025
Initial Observation Date	04/12/2025
Final Observation Date	04/12/2029
Maturity Date	11/12/2029
Early Redemption Observation Dates	04/06/2026, 04/09/2026, 04/12/2026, 04/03/2027, 04/06/2027, 07/09/2027, 06/12/2027, 06/03/2028, 05/06/2028, 05/09/2028, 04/12/2028, 05/03/2029, 04/06/2029, 04/09/2029

Alternative Early Redemption Period	04/12/2025 (excluding) - 04/12/2026 (including)

## Intended Retail Investor

The product is aimed at investors who:

- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering capital growth and have an investment horizon in line with the recommended holding period stated below.
- Are able to bear total loss of their investment and accept the risk that the Issuer and / or Guarantor could fail to pay the capital and any potential return.
- Seek to mitigate the risk arising from the default of the Guarantor through the use of collateral.
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Summary Risk Indicator

Lower risk  Higher risk

The risk indicator assumes you keep the product for 4 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Inflation Risk : if the economic situation is characterized by a high inflation persisting throughout the life time of the product, then the "real" return of the product, equal to its return minus the inflation rate, might be negative.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Market could develop very differently in the future.

#### Recommended holding period:

Until the product is called or matures

This may be different in each scenario and is indicated in the table

#### Example Investment:

USD 10,000

Scenarios	If you exit after 1 year	If you exit at call or maturity
Minimum*	There is no minimum guaranteed return. You could lose some or all of your investment	
Stress	What you might get back after costs	USD 764
Product ends after 4 years	Average return each year	-92.4%
Unfavourable	What you might get back after costs	USD 4,511
Product ends after 4 years	Average return each year	-54.9%
Moderate	What you might get back after costs	USD 11,500
Product ends after 6 months	Percentage Return	15.0%
Favourable	What you might get back after costs	USD 11,500
Product ends after 6 months	Percentage Return	15.0%

(\*) the return shown in the Minimum Scenario is the Minimum Reimbursement and does not include other type of return such as guaranteed coupon payments.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The % figures in the table represent the potential positive (green) or negative (red) returns you might achieve at the end of the recommended holding period (last column) or by selling the product before (previous column) and for a stressed, unfavourable, moderate and favourable scenario (per line). These scenarios were calculated using simulations based on the underlying's past performance.

## WHAT HAPPENS IF SOCIÉTÉ GÉNÉRALE IS UNABLE TO PAY OUT?

If the Issuer defaults you may only claim any unpaid amount from Société Générale (the Guarantor). Should Société Générale default or file for bankruptcy, you will have recourse over the collateral assets. Depending on their net value, you may suffer a partial or total loss of the invested amount, whilst keeping a recourse on Société Générale for the shortfall with your claim. If the Guarantor becomes subject to resolution measures in the form of the bail-in tool ("bail-in"), your claim may be reduced to zero, converted into equity or its maturity may be postponed. Please be aware that your Investment is not covered by any investor compensation or guarantee scheme.

Please find the ratings of Société Générale at <https://investors.societegenerale.com/en/financial-and-non-financial-information/ratings/credit-ratings>.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- USD 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date 11/06/2026	If the product reaches maturity
<b>Total costs</b>	USD 1,111	USD 1,111
Annual cost impact(*)	14.4%	3.2% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 18.2% before costs and 15.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	11.1 % of the amount you pay in when entering this investment	USD 1,111
Exit costs	0.5 % of your investment before it is paid out to you	USD 50

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

**Recommended Holding Period: 4 years, which corresponds to the product maturity.**

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices expressed as percentages of the Nominal Value and the difference between the bid and offer prices (the spread) will not be more than 1.00% of such Nominal Value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

## HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIETE GENERALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (<http://kid.sgmarkets.com>).
